SUMMARY

Computer Science undergraduate (B.Tech, expected May 2027, CGPA 8.1) and full-stack developer with Java backend internship experience and two team-led AI projects (React, Node.js, FastAPI, Redis, MongoDB, Google ADK). ServiceNow Certified System Administrator and Application Developer; HP Hackathon 2026 winner; mentored 100+ students in technical workshops; 170+ LeetCode problems solved. Seeking a software engineering role to build reliable, scalable products.

EDUCATION

Lendi Institute of Engineering & Technology - B.Tech, CSE (CGPA: 8.1) 2024 - May 2027 (Expected)

Andhra Polytechnic, Kakinada - Diploma, Computer Management & Engineering (85%) 2021 - 2024

CERTIFICATIONS

ServiceNow Certified System Administrator (CSA) | ServiceNow July 2026

ServiceNow Certified Application Developer (CAD) | ServiceNow August 2026

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL
Frontend & Backend: React.js, Node.js, Express.js, FastAPI, Java REST APIs, API testing with Postman
Databases: MongoDB, SQL (query optimization, schema design and indexing)
AI & Agentic Systems: LLM integration, multi-agent design (Google ADK), AI coding assistants (output validated with test cases before merging)
Performance & Systems: Redis caching, Redis job queues (asynchronous processing), rate limiting, CI/CD
Tools & Platforms: Git, GitHub, ServiceNow (CSA and CAD certified), AWS (basic), Render, Vercel, VS Code
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Team Leadership, Mentoring

EXPERIENCE

Java Full-Stack Developer Intern | HMI Engineering Services, Visakhapatnam (On-site) May 2023 - Nov 2023

- Built Java REST APIs for core business logic modules, reducing data processing latency by 25% (before-and-after comparison).
- Optimized SQL queries and database schemas for high-traffic reports, cutting query execution time by 30% (before-and-after comparison).
- Wrote and ran Postman test cases for 3 major features, reducing production bugs by 10%.
- Collaborated with the full project team and applied feedback from monthly code reviews by senior engineers.

Campus Crew Ambassador | HackerRank Present

- Mentored 100+ students through technical workshops and promoted HackerRank's coding platform to the student community.

PROJECTS

Hiring Automation System (Agentic AI Platform) | *React, Python, FastAPI, Redis, Google ADK* Feb 2026

- Led a 7-member team on an industry-provided problem statement, coordinating frontend, backend and AI modules.
- Designed a multi-agent system with 4+ specialized AI agents (resume analysis, ATS scoring, interview question generation, scheduling) using Google ADK.
- Implemented Redis-backed job queues to process bulk requests for 100+ candidates, separating API requests from long-running AI tasks, with caching to avoid redundant processing.
- Contributed to the React interface where recruiters upload resumes, view scores and schedule interviews.
- In testing on 100+ resumes against manual recruiting, reduced screening time by 60%.

ApexResume (AI Resume Intelligence Platform) | *React.js, Node.js, Express.js, MongoDB, LLMs* Jun 2025

- Led a 7-member team building a MERN web application for ATS scoring, skill-gap analysis, job recommendations and resume enhancement.
- Integrated LLM-powered career roadmaps and resume enhancement; implemented response caching and rate limiting to protect LLM-backed API endpoints.
- Configured CI/CD pipeline and deployment setup for Render and Vercel.
- A survey of 200+ college seniors reported a 40% improvement in user engagement.

ACHIEVEMENTS

- **Winner, HP Hackathon 2026** (Andhra University): led a team to build AI Startup Builder.
- **2nd Prize, Ideathon, LNIT SUMMIT 2K26**: pitched an agentic AI drone system and published an article on it.
- Selected as HackerRank Campus Ambassador; solved 170+ problems on LeetCode.
